

# Nordic - Top 3

## *Pike, black grouse, capercaillie - all in 3 days*

***T***his is the package for you who are looking for a real Swedish challenge. For three days we will fish for pike, hunt black grouse and hunt capercaillie.

***T***he pike is one of the most popular fish species to fish for in Sweden. Fishermen from all over the world come here to challenge the mighty predator. We use a boat or a canoe to increase your chances.

***F***or bird hunters there are few birds more challenging and exclusive as the capercaillie. You can spend a life time trying to master the art of capercaillie hunting and there is never a guarantee to succeed. But with a good guide and well trained dogs you give your luck a push!

***E***ver seen 30-50 black grouses at the same time? Welcome to the black grouse arena. Early in the morning we make our way to the arena and wait in one of our many hides. Once the birds fly in, you make your pick and with the help from your guide it is time to make the shot you will remember for a long time.

*Remember these are three exclusive trophies and you should never expect it to be easy.*

**Day 1** – arrival day and dinner

**Day 2** – early morning and black grouse hunting at the arena. Breakfast once we get back to the camp and the rest of the day is spent at a lake for really exciting pike fishing. Dinner and sauna in the evening.

**Day 3** – full day in the forest hunting for capercaillie using a “barking tree dog”, a Finnspitz. If the snow has fallen we will take the skis instead. Dinner and sauna in the evening.

**Day 4** – the third day we use as back up day. Depending on the success the previous days we fish pike, hunt capercaillie and/or hunt black grouse. Dinner and sauna in the evening.

**Day 5** – departure after breakfast

Season: Oct 1st - Nov 15th

Price

# Accommodation and food

Our camp is located in the small community Husvallgölen, between Sälen and Särna in Northern Dalarna. The camp is nicely situated next to the river of "Fuluälven" and next to the hunting ground. It is walking distance (50 meters) to the river where you can fish for grayling and trout.

The new Camp Nordic Footprints consists of three buildings; Valhalla, Midgård and Utgård. The camp also has a large wood fired sauna that is available for rent.

The menu is based on local food and game meat, fish, berries and fruit is on the menu. We will of course adapt the menu according to your preferences and allergies.

## Welcome to northern Dalarna

Nordic Footprints is a family owned company that specialises in bird hunting (capercaillie, black grouse and ptarmigan) and wilderness fishing. We also arrange hunting for elk and beaver and hunting trips to Estonia.

We hunt on more than 22000 hectare and parts of the land are exclusive to us. We are working on a daily basis on the hunting ground and know where the animals are located. We have access to many rivers, streams and lakes offering perfect fishing for the sports fisherman. There is good fishing for trout, grayling, char, pike and perch.

Why choose Nordic Footprints?

- We guarantee a personal exclusive experience in a familiar environment
- We are a small company committed to personalized service and unsurpassed support
- All our professional guides have experience in hunting and fishing both as working guides and as a great personal interest

Welcome to hunt and fish with us.
