

Ptarmigan

Hunting with pointing dog or with skis

*W*e hunt ptarmigan in the Swedish mountains where you can choose between two different hunting packages:

#1 Live comfortable in a cottage with sauna and all other facilities. Each morning your guide will drive you to the hunting ground where you will start walking from the valleys up to the mountains. This package includes some walking in the forest and are also the cheapest one.

#2 Wilderness camp. Together with your guide and all the equipment you will fly helicopter to a hunting area up in the mountains where you will place the base for the next couple of days. Choosing this package gives you more hunting time during the days since there will not be as much transport needed. The wilderness camp is normally two tents, one for eating and one for sleeping. There are no facilities at the camp.

*T*he hunting style will differ during the season and in the beginning of the season we will hunt with pointing dog and when the snow has fallen we will change the dog to skis. Recommended weapon is shotgun with calibre 12-20 and when the snow has fallen we use rifle with calibre 222 Rem.

*B*elow is a price example of package #1 if you are interested in the other packages, contact us for more information and prices
